

Prof Trevor Marshall started his career as an engineer, and is now a Senior Life Member of the IEEE. He has held a ham-radio license since 1965. He taught at Curtin University in Western Australia for many years before transitioning to Medical Research in 1980, where he wrote his PhD on Diabetes. Recently he has focused on Predictive and Preventative Medicine as the director of the Autoimmunity Research Foundation in California. Most recently, he has conducted studies of the impact of Wireless technology on the human body, summarized in a peer reviewed paper, "Electrosmog and Autoimmune Disease."
